“Censortive” is a story by a Chinese author that combines the words “censor” and “sensitive” and will explore the idea of permitted speech in the People’s Republic of China.

2

The #twitterfiction Festival
showcase returns to China for
the final installment of
#Censortive from
@Chill4Fun. - December 2

@TwitterBooks

I am Chill Fun from People
Republic of China, which you
can also call it Public Rumors
of China. I have to use an
alias. #twitterfiction -
November 29

@Chill4Fun

[@Chill4Fun](#) - I'm from the future China in 2049, aim to destroy the Great Fire Wall. I found myself trapped in 2012 which could be dangerous. [#Censortive](#) - November 29

[@Chill4Fun](#) - 2049 Great Fire Wall 2012 [#Censortive](#) - November 29

[@Chill4Fun](#) - I use 00≤ translate to tweet in bilan&ua&e. As you saw, I couldn't type the 7th letter, I have to replace it with "&". [#Censortive](#) - November 29

[@Chill4Fun](#) - 00&00≤ [#twitterfiction](#) [#Censortive](#) - November 29

[@Chill4Fun](#) - "&" is the first letter of the name of the Party in Chinese, only the party members are allowed to use it. It blocks my thought. [#Censortive](#) - November 29

[@Chill4Fun](#) - So I don't have a girl friend, I don't believe in God, I couldn't use 00≤ in my time, and we don't know what is God. [#Censortive](#) - November 29

[@Chill4Fun](#) - I am still feeling lucky. Cause I know someone's name is ** or ***, they have to go through a strict process to change it. [#Censortive](#) - November 29

[@Chill4Fun](#) - I used to imagine 2012 is a way better year than 2049. I was wrong. When I saw people here say "Spartan", you know what it means? [#Censortive](#) - November 29

7

@Chill4Fun - <http://t.co/pJZ3W5CE> - November 29

@Chill4Fun - ████████████████████#Censortive - November 29

[@Chill4Fun](#) - "Spartan" has the similar sound with "18 big", is another way of saying the 18th Party Congress. You can't talk about it online. [#Censortive](#) - November 29

[@Chill4Fun](#) - So when I said "Spartan", please don't float some naked muscle men in your mind. There is another joke about "7" i will tell. [#Censortive](#) - November 29

[@Chill4Fun](#) - There are 7 Politburo Standing Committee members from the 18th Party Congress. Everything with "7" is blocked. Don't mention Snow White. - November 29

[@Chill4Fun](#) - A Men's fashion brand named "7 Wolves" is also put into the blacklist. A bad metaphor I guess. [#Censortive](#) - November 29

[@Chill4Fun](#) - I guess the enterprise will avoid to name with "7" or anything relevant, but the forbidden number once to be 9...so...who knows. [#Censortive](#) - November 29

[@Chill4Fun](#) - One thing I am still quite curious about...They block "McDonald's" on &oo≤. I don't know why. Maybe the leaders love KFC? [#Censortive](#) - November 29

[@Chill4Fun](#) - It's mid night in NYC. It's afternoon in Beijing. I have more stories to tell tmr, about the future, about the [#Censortive](#), I wanna hear you - November 29

[@Chill4Fun](#) - As you know, the wormhole is not stable, I might be kicked back to the future, or worse, be caught by government. Good Luck [#twitterfiction!](#) - November 29

[@Chill4Fun](#) - Good night, Good Morning & Good Afternoon. If you still remember, I am Chill Fun from PRC in 2049, sorry for late cause I got blocked by F&W - November 30

[@Chill4Fun](#) - Let's begin some stories on movies in PRC. Many movies couldn't get through the [#Censortive](#) process even since the screen writing stage. - November 30

[@Chill4Fun](#) - [#Censortive](#) □□□□□□□□□□□□□□□□□□
 □□□□□□□□□□□□□□□□□□□□□□□□□□□□□□□□
 □□□□□□□□□□□□□□□□□□□□□□□□[#TwitterFiction](#) -
 November 30

@Chill4Fun - In China, watch Chinese Movie, esp. historical ones, the fun is out of the movie, but the metaphor and parody of nowadays society. #Censortive - November 30

@Chill4Fun - The Audience just like Pavlov's dogs, they learned how to see things from which it is not. We have a film recently on <http://t.co/Jno6uZg> - November 30

@Chill4Fun - Yknow, whenever you watch a Chinese Movie on Han dynasty, if not Qin, or Yuan, Min, Qin... in our eyes, they are all taken about PRC #Censortive - November 30

@Chill4Fun - There is a new movie named 1942 about the mass hunger which caused millions of dead in Republic of China is taken as the reflection of 1962. - November 30

@Chill4Fun - Now you see. #Censortive system twists people's mind into a ridiculous status. They only see what's been filtered, not what it is itself. - November 30

[@Chill4Fun](#) - We call it "Negative Power". For example, Li always got angry about the CCTV news because everyone is so happy and satisfied.
[#Censortive](#) - November 30

[@Chill4Fun](#) - [#Censortive](#) 中国“人权”问题
中国问题
中国问题
中国问题
[#Twitterfiction](#) - November 30

[@Chill4Fun](#) - Ads before/After CCTV News time block have the highest price, called golden time. Billions of RMB for those who easily believe in lies. - November 30

[@Chill4Fun](#) - Even a Scifi movie,could be challenged as [#Censortive](#) content. - November 30

[@Chill4Fun](#) - There was a Scifi movie script sent to [#Censortive](#) bureau and got rejected. How could the end of the world happen in China? - November 30

[@Chill4Fun](#) - How could you destroy the Great Wall and Tian'an Men square? How could the People Police and People army defeatable?
[#Censortive](#) - November 30

[@Chill4Fun](#) - Now you can understand why there is such a few Scifi movie in China, even the cheesy ones. Who control the past, who also control the future - November 30

[@Chill4Fun](#) - Now it's the year of 2012, it is said to be end of the world. Not in my time line. But maybe it's not a bad thing for you. [#Censortive](#) - November 30

[@Chill4Fun](#) - I am slowly recover from the mind blockage of Great Fire Wall in 2049. I can type letter "g" sometimes, if not in capital. [#Censortive](#) - November 30

[@Chill4Fun](#) - In your world, [#Censortive](#) is only through books, movies, internet, newspaper, medias. But in my world, it is much worse. [#Censortive](#) - November 30

[@Chill4Fun](#) - If I get it right, in 2018, the 2nd generation of the Great Fire Wall develop a technology to block the [#Censortive](#) words in your voice. - November 30

[@Chill4Fun](#) - It's just the 1st step of the evolution of [#Censortive](#) system, that's why I came back here to destroy the Great Fire Wall. Hope not too late - November 30

[@Chill4Fun](#) - Sorry folks, I was trapped in the Beijing weekend traffic for we are still in the world without Google Auto Driving Cars. [#Censortive](#) - December 1

[@Chill4Fun](#) - It's freezing cold today in Beijing, and hazing. It reminds me that even the weather here is under censorship. [#Censortive](#) [#TwitterFiction](#) - December 1

[@Chill4Fun](#) - For example, if the temperature goes above 40C degree, the factory and school have to stop working and teaching, so there are a lot of 39C. - December 1

[@Chill4Fun](#) - Air pollution which is highly noticed, the number of PM2.5 significantly differ between US embassy and China Weather Bureau. [#Censortive](#) - December 1

[@Chill4Fun](#) - If the Bureau said "Good", US Embassy would be "Lightly polluted", If the bureau goes to "Lightly polluted", US number would be "Poisoned". - December 1

[@Chill4Fun](#) - Don't ask me to take sides. I choose to believe my nose and eyes, Statistically, I am much more like an American than a Chinese. [#Censortive](#) - December 1

[@Chill4Fun](#) - Play with number is a long tradition game since the founding of PRC. One of the latest issue the the number of death in 7.21 Beijing Storm. - December 1

[@Chill4Fun](#) - Chinese have bad memory. I can hardly recall the number of death in 2011 Wenzhou Rail crash, not mentioned in 2003 SARS, etc. [#Censortive](#) - December 1

[@Chill4Fun](#) - For the &overnment, the number of the death Shitizen is just like the [#Censortive](#) words on internet, in newspaper or Television. [#Censortive](#) - December 1

[@Chill4Fun](#) - We can never expect the scene of Obama reading out every death's name after 911 in PRC. In China, death without name is a common sense. - December 1

[@Chill4Fun](#) - The biggest problem is: there is no such thing called "Censorship standard" in China. It's changing all the time and no clues to follow. - December 1

[@Chill4Fun](#) - It's just like a big black box. You don't know what the answer is. of course not 42. So the medias learn the way to survive-self-censorship. - December 1

[@Chill4Fun](#) - Everyday, there will be a red-headed document waiting for the chief editors of every media. What could not be reported, which de-prioritized - December 1

[@Chill4Fun](#) - Which topic should be led to a positive direction. Everything is going under the name of "stability". A keyword to maintain the control. - December 1

[@Chill4Fun](#) - Me again. A time traveller from 2049 China to destroy the Great Fire Wall which is kind of impossible. It's my last day here. [#Censortive](#) - December 2

[@Chill4Fun](#) - In my timeline, Great Fire Wall is not only used in China, but an export technology to rule the world. [#Censortive](#) <http://t.co/koSVD2ia> - December 2

[@Chill4Fun](#) - The Image I posted shows 3 dimensions of [#Censortive](#) blockage, visionary, oral, imaginary. [#Twitterfiction](#) - December 2

[@Chill4Fun](#) - It's the 5th generation of the Great Fire Wall. It's the chip in our brain, the robot in the air, the cage of our life. [#Censortive](#) - December 2

[@Chill4Fun](#) - I remembered there is a case in 2045. An alternative religion called "LOVE" was banned. and also that word. replace it with ****. [#Censortive](#) - December 2

[@Chill4Fun](#) - People have to create another expression to replace the word "LOVE", and there are millions of ways to tell love. [#Censortive](#) - December 2

[@Chill4Fun](#) - Signifier and Signified are totally unchained and floating even in daily language. People develop a new way to communicate. [#Censortive](#) - December 2

[@Chill4Fun](#) - The New Born Babies are implanted the [#Censortive](#) Chips for realtime blockage and it is sync-up with the central database of &FW. - December 2

[@Chill4Fun](#) - There is boundary and limits for the imagination. The safest way is to follow what've already been proved to be safe and doable. [#Censortive](#) - December 2

[@Chill4Fun](#) - There is no such thing called future if you don't begin to change sth from now on. It is not only the [#Censortive](#) system against Chinese. -
December 2

It exists in all of the society
which believe in power and
lust more than faith of &ods.
Share your voice and stories
out loud! #Censortive -
